

Aerial Work Platforms

Aerial Work Platforms - There are numerous attachments meant for lift trucks which could be used to be able to help expand the functionality of your forklift and allow you to pick up stuff, handle materials with less effort or to accomplish clean-up tasks.

Many of the accessories are particularly designed to fit on the blades themselves. Fork extensions for instance, are utilized when you need a lot more fork length, that increases lifting capacity. Blade extensions come in lengths varying from forty eight to one hundred twenty inches. Rounded or triangular attachments are one more kind utilized when transporting rolled material so as to ensure it does not roll off of the typical flat forks.

Lifting accessories can be pivoting and telescoping crane attachments. They come in various kinds. These attachments are normally used for transporting lumber, metal bars, poles or whichever type of bulky items. Other accessories such as other kinds of hook plates and hooks are existing so as to lift stuff utilizing a chain or sling. Magnetic lifters and slab lifters are other things that can be utilized together with hook attachments. Slab lifters are specialized accessories which are designed for lifting a variety of materials that are delivered in a sheet or slab format. Rug rams or carpet poles are other lifting tools which connect to your lift truck in order to make transporting rolls of carpet easier. The accessory connects onto the forklift's forks and has a pole that goes through the middle of the carpet roll.

There are several types of forklift accessory utilized for facility maintenance such as snow forks. These industrial forks can be attached to front end loaders and used for transferring materials like for instance dirt, and mulch as well as snow. Other common cleanup accessories consist of standard sweepers and magnetic sweepers. Standard sweepers includes a broom that the forklift blades hook onto for sweeping big spaces such as factory floors, parking lots and warehouse. The magnetic sweeper is the same except that it has a magnetic plate rather than bristles. The magnetic sweeper is utilized in places where there is lots of metal fragments such as on shop floors for instance. Sweepers have widths up to 60 inches and this surface area makes clean up quick and effortless.

Material spreaders are other accessories used on forklifts. These spreaders are useful for various applications like spreading fertilizers, insecticides, seeds, ice melt, rock salt and pellets.

Work platforms are another optional lifting accessory that lots of companies use day by day. The platforms range in size from 36" x 36" to up to 60" x 60". There are several models available which are capable of folding up and storing into a smaller space. Work platforms are designed to raise employees up to an overhead location making use of the lift truck. Larger platform models have added space for staff in order to bring tools and other necessary items meant for the task. Often work platforms are constructed of steel or ploy material.
