

## JLG Forklift Part

JLG Forklift Parts - In the late 1960's John L. Grove, with his wife Cora started out on a cross country voyage in their RV. Recently retired, after spending many years working with his brother to assemble their crane business into an industry leader, John had no idea that fateful trip would permit JLG Industries, Inc to emerge. The world leader of mobile aerial work platforms and precision materials handling equipment was the end result of a road expedition.

All through their journey, John reacquainted himself with former business connections along the way. In combination with these conversations and a significant event; two workers had been unfortunately electrocuted on scaffolding when the Groves were passing through the Hoover Dam. John discovered a vast market for a product that could quickly and safely elevate people in the air to accomplish maintenance and other construction services.

After their return from vacation, John set up a joint venture with two of his friends and bought a metal fabricating business in McConnellsburg, Pennsylvania. Starting with a small crew of twenty employees, they produced and sold their first JLG aerial work platform in 1970. The business incorporates some of the simple design elements of that original lift into existing models.

JLG forklifts have come a long way since Mr. John L. Grove returned to town from his cross-country road trip and since the initial aerial work platform debuted on the market. At present, the business proudly continues to expand itself into many marketplaces worldwide and develops new products to ensure clients are capable of being more efficient and perform in the workplace within a safer atmosphere.
